Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 06/28/2005 have been fully considered but they are not persuasive.

Regarding Claim 33, Examiner failed to address the limitations of the claim specifically, but the Tanaka reference still shows the claimed subject matter. Please see below for the specific rejection of the limitations. The Examiner apologizes for omitting Claim 33 from the specific rejection in the previous office action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 33 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Tanaka et al.

Regarding Claim 33, Tanaka shows a method for displaying live continuous video (col. 3 lines 25-60, video transmission) comprising encoding video into a low resolution bit rate stream and a higher-resolution bit rate stream (fig. 1, col. 3 lines 25-67, col. 8 lines 7-52, fig. 14A and 14B, multiple resolutions streams with capability to switch between streams, transmission module uses MPEG compression, which inherently

Art Unit: 2611

encodes the video, col. 3 lines 45-55) and displaying a single image of the video using the higher resolution bit rate stream (fig. 12, 13, 16, 17, col. 8 lines 15-30, displaying image in watch mode with high resolution priority). Tanaka also shows that the resolution changes when more than one video signals are displayed (col. 11 lines 10-25, when single video display is selected, resolution is increased from pained display).
